Why -we focus on phthalates and PVC

Continence Care

Catheters Urine bags Urisheaths Anal irrigation Facts about PVC and PHT's:

- Phthalates makes PVC soft and flexible
- PHT counts for 30-40% of the product weight
- The phthalates are not chemically bonded

Problems whit use of PVC and PHT's:

- Certain PHT's are hormone disrupting
- The Chlorine in PVC is problematic as waste

How -we reduce consumption of PVC and PHT Our PVC/PVdC policy

- We choose PVC-free in new products -when technical possible
- Substitute in existing products when possible

Our phthalate policy

- We choose phthalate-free materials for new products
- We strive to offer customers alternative products
- We welcome and support an international ban against the use of phthalates in medical devices
